自治組織に加入しよう

You are advised to join the community association

Can you go on living, all by yourself?

At times of disaster, ambulances and fire engines cannot move immediately.
At times like that, you need the connection with your neighbors.

Safety and security activities

We prevent crime in the community through seeing children to and from school, and neighborhood watch.

Environmental beautification

We clean our neighborhood and manage the garbage station for everyone to use pleasantly.

~About the local community association fee (block fee)~

The local community association fee (block fee) is used for the management of garbage stations, electricity charges for community centers and streetlights, as well as for the subsidies for each group activity such as children's association. This is the fund necessary for the maintenance/management of local facilities and for operation of autonomous organizations.

Interaction

We deepen connections in our community through recreational activities that people of all ages can enjoy.

Connecting the town with information

We get information about our town as soon as it is released, through the town paper and circular.

■For this matter, please contact the representative of the self-governing organization in your area or the head of the neighborhood group.
